

DMX PUMP

Premium-grade DMX-controlled submersible fountain pumps are primarily designed for use in dancing fountains, dry fountains, and both indoor and outdoor public installations. They are ideal for applications requiring fast-response dynamic speed control to produce precise and synchronized water effects..

Features:

- Designed for operation in both submerged (wet) and dry installation environments.
- Each unit supports individual DMX addressing for independent control.
- Provides precise, continuously variable speed control via DMX for smooth flow rate adjustment.
- Equipped with a DMX-based height variation system to regulate water effect elevation.
- Optimized for installation directly beneath the nozzle for efficient performance.

SPECIFICATIONS:

- Input Voltage: 230V AC (1Phase)
- Power: 1kW to 1.5kW
- Discharge: 270LPM ($\pm 5\%$)
- Head Range: 10meter ($\pm 5\%$)
- Control: DMX operated
- Protection rating : IP68
- Housing: Stainless Steel -304 grade

Model: 1.5kW DMX Pump

Applications : Dancing fountains, water shows, dry fountains etc.

- Optimized for installation directly beneath the nozzle for efficient performance.

SPECIFICATIONS:

- Input Voltage: 230V AC (1Phase)
- Power: 1.5kW to 3.5kW
- Discharge: 400LPM ($\pm 5\%$)
- Head Range: 15meter ($\pm 5\%$)
- Control: DMX operated
- Protection rating : IP68
- Housing: Stainless Steel -304 grade

Model: 3.5kW DMX Pump

Applications : Dancing fountains, water shows, dry fountains etc.
